Nitro Slash is not only built to perform with its adjustable slipper clutch, disc brake, and race-inspired suspension geometry, it's also built Traxxas Tough™ for all-day driving fun. Nitro Slash's robust design keeps annoying breakage to a minimum so that the action can keep going on and on. Full rubber-sealed ball bearings provide the ultimate protection and low maintenance for nitro environments. The Magnum 281™ transmission uses a steel-composite planetary gear differential with built-to-last hardened steel gears. The gear differential requires no time-consuming adjustment and is virtually maintenance free. Traxxas engineers are dedicated to keeping you on the throttle, not on the workbench.

THE ULTIMATE NITRO 4X4 MAXX MONSTER!

The new T-Maxx 3.3 is the biggest Maxx ever. New, giant Maxx tires deliver massive grip off-road and at 6.3" tall, they add increased ground clearance to gobble up deep ruts and overcome huge boulders. In the city, urban obstacles such as curbs and stairs beckon for an all-out Maxx assault. Maxx tires come pre-glued to 3.8" Mirror-chrome Hurricane wheels. Traxxas engineers equipped the new T-Maxx 3.3 with an extended wheelbase (30mm longer) for maximum stability. T-Maxx is able to put more power to the ground for even more acceleration and amazing directional control. There's no skimping when it comes to the chassis. It's formed from 4mm thick 6061-T6 aluminum, and then anodized in brilliant blue. Meaty new chassis braces and an all-new skid plate add rock-solid rigidity.

Traxxas EZ-Start System

The Traxxas EZ-Start System brings the safety and convenience of push-button electric starting to TRX® Racing Engines. Simply plug in the hand-held control unit and push the button. The EZ-Start System automatically heats the glow plug and the lightweight, compact on-board drive spins the engine. The drive system is attached to the engine, so your hand is safely away from spinning shafts and motors. The new roller clutch design ensures positive engagement every time. Traxxas' exclusive Smart Start technology monitors critical starting functions, automatically sensing and diagnosing potential problems for reliable, trouble-free engine starting.

1. Indicator light shows the status of the starter drive circuitry.
2. Integrated vehicle connector for one-handed operation.
3. Glow plug status indicator signals failed glow plugs.
4. Efficient, thermal-sensing circuitry provides overload protection for the motor.
5. Fully-enclosed battery.†
6. Regulated output supplies constant voltage to heat the glow plug, regardless of battery condition or starter motor load.
7. Compact, planetary gear reduction.
8. Elastomer cush drive output protects critical starter gears.

TRX® Racing Engine Features

- TRX® IPS Crankshaft**
 The one-piece 12mm IPS (Integrated Pilot Shaft) crankshaft provides extremely precise gear mesh and virtually eliminates vibration, which could rob 10% of the engine's power.
- Equipped with Starter**
 The TRX® Racing Engines are not only the most powerful engines in their class, they are the only ones that allow the convenience of either a pull start or the Traxxas EZ-Start push button starting system.
- Bolt-On Header**
 The header bolts on tightly to the round exhaust port and seals with an O-ring to virtually eliminate messy, power-robbing exhaust leaks.
- Lifetime Engine Replacement Plan**
 No matter what happens to the engine, it's covered. Exchange a worn out, burned up engine for a brand new one at 50% off the regular list price. It's easier and less expensive than rebuilding an engine yourself.
- O-Ring Sealing**
 All mating gasket surfaces are sealed with superior O-ring gaskets to wipe out troublesome air leaks that cause poor performance and inconsistent tuning.
- Multiple Engine Options**
 TRX® Racing Engines are available in a configuration to fit just about any model that accepts a small block engine. Engines are available with IPS, standard, or short cranks with or without pull starter.
- Head Protector**
 The impact resistant head protector is designed to absorb harsh impacts and to protect your cylinder head from rollovers.
- High-Volume Air Filter**
 The air filter is often overlooked as being a key to engine performance and life. Not so with the TRX® Racing Engines! It's ultra low-restriction air filter provides superior air-flow and filtration for more power and long engine life. The inside of the filter mates perfectly to the carburetor to eliminate turbulence as air passes through the carburetor.
- Long Rod Design**
 Longer than in any other small-block .15 engine, the connecting rod decreases the rod angle throughout the entire stroke of the piston, reducing piston side load for less friction and more power.
- Manufactured by Traxxas**
 TRX® Racing Engines are manufactured entirely in Traxxas' new state-of-the-art facility. Customers and dealers get the benefit of full Traxxas customer support and know-how.
- Availability**
 Because TRX® Racing Engines are produced in large volumes for Traxxas cars and trucks, the economies of scale allow new engines and parts to be plentiful and more affordable.
- Molded Slide Carburetor**
 The slide carburetor is molded out of high tech composites for light weight and reduced heat transfer. Precision molding provides a smoother inlet tract to flow air faster and more efficiently than ordinary machined carburetors.
- Multi-Shaft Crankshaft Option**
 The Multi-Shaft crank uses threaded inserts in the end of the crankshaft to provide short (cut) or standard length crankshafts.
- Innovative Porting**
 Careful attention to port shape and size permits an incredibly wide and linear powerband not found in other engines.

Slide Carburetor

TRX® Racing Engines are equipped with the TRX® Composite Slide Carburetor. The slide carburetor is desired by performance enthusiasts because it provides less restrictive, straight-through airflow for more power and better throttle response than typical barrel carburetors. Only Traxxas has the integral molded spray bar that provides the best possible fuel atomization providing increased torque and efficiency throughout the engine's entire operating range. A slide carburetor is an expensive option on some models, and not even available on others!

TRX[®] PRO-15 ENGINE

NITRO PERFORMANCE EXCITEMENT!

CARBURETOR

The carburetor for the TRX[®]Pro.15 features a larger, 6mm intake bore for better breathing. Double O-ring sealing on both the low- and high-speed needle adjustments help to eliminate air leaks. The carburetor barrel has a dust cap for extra protection against dirt.

ALUMINUM PISTON

The TRX[®]Pro.15's durable aluminum piston features an oil groove in the top. The oil groove promotes better sealing and compression. It also increases the lubrication between the cylinder sleeve and the piston, reducing wear and heat.

Mount not included.

CONNECTING ROD

This special channeled-beam connecting rod offers greater strength and long-lasting performance. The channeled design has an extra benefit of directing the oil flow down to the crankshaft bushing.

BALL BEARINGS

The TRX[®]Pro.15 uses precision steel ball bearings for high-performance, high-RPM durability. The ball bearings reduce friction so the engine will perform more responsively. The bearings are also sealed to keep out dirt.

Quick Features

- Double O-ring seals, on the high- and low-speed carburetor needles
- Reusable foam air filter elements
- Machined aluminum cooling head
- Channeled-beam connecting rod for improved oil flow and strength
- Heavy-duty recoil starter
- Large-bore, high-flow carburetor
- Precision ball bearings
- ABC (aluminum, brass, chrome) construction
- Industry-standard mounts and crankshaft lengths to fit most applications
- Two-year warranty and Lifetime Engine Replacement Policy

POWER AND STYLE

The DCB M41 Widebody catamaran, designed by DCB (Dave's Custom Boats) founder Dave Hemmingson, is the largest model offered in the DCB M-Series. With its precision sculpted design and a pair of Mercury Racing 1350 engines, it speeds across the water at 175mph! Traxxas has faithfully captured the incredible looks and performance of the DCB M41 in a detailed scale replica that is versatile, fun, and fast. The catamaran hull has been accurately reproduced to deliver the speed, stability and confidence that the full-size M41 is famous for, allowing you to have fun wherever your marine adventures take you. The M41 replica is equally at home blasting across the waves at the lake on a fun run or exploiting its 50+mph speed on a favorite stretch of smooth water. The razor sharp handling lets you carve turns with authority and precision and yet, offers easy control while cruising by the shore.
